11/23/2025 - Sprint3 Standup 1
What did you work on since the last standup?
I started working on the recipe pageViewPage and controller so that is not just a void page

What do you commit to next?

I want to finish at least the view and the controller so that I can start working on the functionalities of the controllers next time

When do you think you'll be done?

I can finish up by tomorrow probably

Do you have any blockers?

I cannot see the app since there is a problem with the log in, so I had to manually change the home view page to the recipe page so that I can see all the changes

11/26/2025 - Sprint3 Standup 2

What did you work on since the last standup?
I finished the Recipe ViewPage and started working on the Recipe Page

What do you commit to next?

I want to start connect both pages to the controllers, for now both pages are working fine by themselves, but the controller is still undone, so the functionalities are not working

When do you think you'll be done?

I need at least 3 more days, I think the controller is more complicated than what I thought

Do you have any blockers?

Understanding that the 2 view pages are working fine statically is fine, but I don't know if connecting it with the controller will be easy.

11/29/2025 - Sprint3 Standup 3

What did you work on since the last standup?
I finished up all the functionalities of the recipeView, RecipeViewPage and controller, they are working just fine and are connected to the app

What do you commit to next?

I would like maybe to implement and API or add additional information about the recipes or try to connect the favorites field to the backend so that it is saved when the app is closed

When do you think you'll be done?

This is a longer step, I think I would need like 3 more days, at least after sprint3 is submitted.
